### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/IN 03/00065

I.	Basis	of the	report
----	-------	--------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	De	escription, Pages						
	1-	15	as originally filed					
	Cla	aims, Numbers						
	1-6	5	as originally filed					
	Dra	awings, Figures						
	1-6	3	as originally filed					
2.	. Wii lan	th regard to the lang guage in which the ir	uage, all the elements marked above were available or furnished to this Authority in the nternational application was filed, unless otherwise indicated under this item.					
			vailable or furnished to this Authority in the following language: , which is:					
		the language of a ti	ranslation furnished for the purposes of the international search (under Rule 23.1(b)).					
		the language of pub	plication of the international application (under Rule 48.3(b)).					
		the language of a tr Rule 55.2 and/or 55	anslation furnished for the purposes of international and limit					
3.	Wit inte	h regard to any <b>nucl</b> rnational preliminary	eotide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:					
		contained in the inte	ernational application in written form.					
			ne international application in computer readable form.					
		furnished subsequently to this Authority in written form.						
			ntly to this Authority in computer readable form.					
		The statement that t	the subsequently furnished written sequence listing does not go beyond the disclosure application as filed has been furnished.					
		The statement that the listing has been furn	the information recorded in computer readable form is identical to the written sequence ished.					
4. The amendments have resulted in the cancellation of:			esulted in the cancellation of:					
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					

#### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/IN 03/00065

5. □	This report has been established as if (some of) the amendments had not been made, since they have
	been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

- 6. Additional observations, if necessary:
- V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- 1. Statement

Novelty (N)

Yes: Claims
1-6
No: Claims

Inventive step (IS)

Yes: Claims
No: Claims
1-6

Industrial applicability (IA) Yes: Claims 1-6

No: Claims

2. Citations and explanations

see separate sheet

## INTERNATIONAL PRELIMINARY International approximation REPORT - SEPARATE SHEET

International application No. PCT/IN 03/00065

SECTION V-----

Presently claimed subject-matter seems to be novel since neither the protein nor the gene PINO1 is taught in the available prior art. However, the presence of an inventive step cannot be acknowledged since the provision of the sequence encoding PINO1 apparently could be performed in a straightforward manner without the use of inventive skill (see pages 3 and 4 of present application).

#### General remarks:

- 1). Claim 2 is completely unclear: "coding as claimed in claim 1....?!. In addition, a nucleotide sequence normally does not contain amino acids! Moreover, the nucleotide sequence recited in claim 1 already encodes a protein having 512 amino acid residues- even without any additional residues?!
- 2). Claim 3 seems to be incomplete since features essential to the performance of presently claimed method are apparently missing, such as for instance the primers appropriate to arrive at isolating the PINO1 gene (Art. 6 PCT).
- 3). As regards claim 4 it is unclear whether the term pET20B(+) has a well-recognized technical meaning to a person skilled in the art.
